

Mopping

Hooks

new addition ||
we use substates in function based
← ~~use state~~ (O)
control

Let $\frac{ans}{i} = \frac{useJobs(i)}{i}$

2) Hook me fr, they let you ~~over~~^{use} many
functionality such as lifecycle methods, static
w/o using class based con
mode for bad comp

2) Use State (100) \rightarrow $\left[\frac{100}{H}, \frac{f}{f} \right]$

3) use Effect → lifecycle features
